EDUCATION

UNIVERSITY COLLEGE LONDON

Master of Engineering in Robotics and Artificial Intelligence

Second-Year Results: 84.27% (1st Class)

Modules: Object-Orientated Programming, Introduction to Machine Learning

London, UK

2023 - 2027

ST OLAV VGS

International Baccalaureate Diploma Programme

• Grade: 41/45 with Maths AA HL - 7 and Physics HL - 7

Stavanger, Norway

2021 - 2023

KEY SKILLS

- Python, Pytorch, TensorFlow, MATLAB, LangGraph, CAD, Computer Vision

EXPERIENCE

CISCO

Agentic AI Engineering Intern

- Four-month placement with Outshift by Cisco
- Designed and implemented an agentic workflow using LangChain and LangGraph, enabling modular coordination of LLM-based agents for design generation, refinement, 3D printing and supervision

London, UK

April 2025 – July 2025

GOOGLE

BGN Hackathon - Spotlight' By Gemi9 (Backend-Python)

- Collaborated in a team of five university students to implement a web application to highlight contributions of Black innovators in engineering; Achieved 1st place and "People's Choice" among ten competing teams.
- Utilised Google Cloud Vision AI to detect objects in real-time and Gemini API to retrieve contextual data from reliable web sources, integrated with Cloud Storage Triggers to automate image processing workflows.

London, UK

October 2024 - October 2024

CO-CREATION HUB LTD

Summer Intern

- Developed a roadmap to enhance user experience for a pan-African trading platform.
- Collaborated with education and environmental sector clients alongside development and design teams.

Kigali, Rwanda

August 2023 - September 2023

PROJECTS AND COURSES

ASL FINGER SPELLING TRANSLATOR

(Python)

- Trained a Keras model to classify ASL letters in real-time, leveraging Google's MediaPipe API for hand landmark detection and computer vision with OpenCV.

London, UK

August 2024 - September 2024

EDX

CS50's Introduction to Artificial Intelligence with Python

- Developed core functions for Q-Learning to train an AI player for the game Nim via scikit-learn.
- Leveraged TensorFlow to design and build a Convolutional Neural Network for computer vision, specifically for classifying road signs with a 95% accuracy.

London, UK

June 2024 - September 2024

UNIVERSITY COLLEGE LONDON

Tree Climbing Robot

- Led a team of four to prototype a robot for sensor deployment using iterative development.
- Automated an aerial robot with propellers and an ultrasonic sensor for tree navigation, completing a product test within a set deadline.

London, UK

May 2024 - May 2024

EXTRACURRICULARS

- Music: Clarinettist in All-Souls Orchestra; former member of Regional Youth Symphony Orchestra (Rogaland, Norway)
- Campus Societies: Jazz Society, Computer Science Society and AI Society
