EDUCATION

UNIVERSITY COLLEGE LONDON

Master of Engineering in Robotics and Artificial Intelligence

Second-Year Results: 84.27% (1st Class)

Modules: Object-Oriented Programming, Deep Learning for Robotics and Artificial Intelligence

London, UK

2023 - 2027

ST OLAV VGS

International Baccalaureate Diploma Programme

- Grade: 41/45 with Maths AA HL - 7 and Physics HL - 7

Stavanger, Norway

2021 - 2023

KEY SKILLS

- Python, PyTorch, TensorFlow, MATLAB, LangGraph, CAD, Computer Vision, C, Fusion360, sci-kit learn, GIT

EXPERIENCE

NATIONAL CENTER FOR ARTIFICIAL INTELLIGENCE AND ROBOTICS

Robotics Intern

Abuja, Nigeria

August 2025 - September 2025

- Prototyped an agricultural robot, with WI-FI monitoring, developing seed-dispensing and furrow-opening mechanisms and implementing GPS-IMU-Encoder sensor fusion with a Kalman filter for accurate navigation.
- Enhanced planting efficiency and harvest outcomes by designing a method for increased precision and maintaining high throughput when compared to traditional farming practices in rural Nigeria.

CISCO

Agentic AI Engineering Intern

London, UK

April 2025 – July 2025

- Engineered and deployed an advanced agentic workflow (LangChain/LangGraph) to coordinate LLM-based agents for modular design generation, refinement, and 3D printing supervision during a four-month placement at Outshift by Cisco.

GOOGLE

BGN Hackathon - Spotlight' By Gemi9 (Backend-Python)

London, UK

October 2024 - October 2024

- Collaborated in a team of five to implement a web application to highlight contributions of Black innovators in engineering; Achieved 1st place and "People's Choice" among ten competing teams.
- Utilised Google Cloud Vision AI to detect objects in real-time and Gemini API to retrieve contextual data from reliable web sources, integrated with Cloud Storage Triggers to automate image processing workflows.

PROJECTS

REINFORCEMENT LEARNING CONTROL OF EFFICIENT SOFT EXOSKELETONS

Intelligent Systems Research Engineer

London, UK

September 2025 - Present

- Designing and modelling a novel soft exoskeleton system for assistive technology utilising Twisted String Actuators (TSAs) for high transmission efficiency in lightweight powered clothing.
- Investigating reinforcement learning to manage complex, distributed actuator control.

MULTIMODAL AI LITERACY AGENT

Lead Deep Learning Researcher

London, UK

September 2025 – December 2025

- Led a cross-functional team to architect a multimodal AI agent, integrating a fine-tuned LLM for conversational fluency with a YOLO/CNN vision pipeline for real-time interaction using PyTorch.
- Engineered the core LLM using Retrieval-Augmented Generation (RAG) and dual-dataset fine-tuning to ensure high contextual accuracy and benchmarked performance against state-of-the-art commercial agents.

UKSEDS OLYMPUS ROVER TRIALS BASIC STREAM

Robotics Engineer

London, UK

November 2024 - July 2025

- Led the design and construction of a tracked Martian rover, integrating autonomous QR code detection (MicroPython) and a custom mobile interface for teleoperation across simulated terrain; secured the 'Best Automation' award and 2nd place overall.

EXTRACURRICULARS

- Music: Clarinettist in All-Souls Orchestra; former member of Regional Youth Symphony Orchestra (Rogaland, Norway)
- Campus Societies: Jazz Society, Computer Science Society and AI Society
